JD

SUMMARY

As a dedicated Cloud Engineer with a Bachelor's degree in Computer Science, I specialize in designing and managing cloud infrastructure across AWS and Azure. I excel in implementing industry best practices while leveraging automation tools like Terraform. My goal is to create scalable and secure cloud environments while continually enhancing system performance and reliability.

EXPERIENCE

Cloud Engineer

Tech Innovations, Inc.

07/2022 - Present Tech City, USA

A leading software development company focused on cloud solutions.

- Designed and managed cloud infrastructure on AWS and Azure.
- Implemented best practices for security and scalability, reducing downtime by 15%.
- Automated deployment processes using Terraform, increasing deployment speed by 30%.

Junior Cloud Engineer

NextGen Solutions

01/2021 - 06/2022 Tech Valley, USA

A company specializing in cloud-based solutions and IT consulting.

- Collaborated with DevOps teams to integrate continuous deployment pipelines.
- Monitored system performance using CloudWatch and Azure Monitor to optimize resource usage.
- Troubleshooted cloud-related outages, ensuring swift recovery and minimal business impact.

EDUCATION

Bachelor of Science in Computer Science

State University of Technology

09/2018 - 06/2022 Metropolis, USA

LANGUAGES

English

Native

STRENGTHS

Automation Expertise

Ability to automate infrastructure and streamline workflows.

Security Focus

Strong understanding of cloud security principles and best practices.

Analytical Thinker

Excellent troubleshooting skills with a strong analytical mindset.

KEY ACHIEVEMENTS

Cloud Migration Project

Successfully led the migration of legacy systems to a cloud environment, improving overall system performance.

Outage Reduction Initiative

Developed a monitoring solution that decreased system outages, enhancing user experience.

SKILLS

Hard Skills

Cloud Platforms: AWS, Azure, GCP

Infrastructure as Code (Terraform, CloudFormation)

Linux/Windows Administration

Networking Fundamentals (VPC, DNS, Load Balancers)

Monitoring Tools (CloudWatch, Azure Monitor)

Soft Skills

Problem-solving

Team Collaboration

Effective Communication
