SUMMARY

As a Cloud Infrastructure Engineer with over 4 years of experience, I excel in building and maintaining cloud infrastructures that support essential applications and services. My expertise includes managing resources, optimizing costs, and ensuring system availability through effective disaster recovery solutions. I am passionate about leveraging technology to drive improvements in operational efficiency.

EXPERIENCE

Cloud Infrastructure Engineer

Tech Solutions Inc.

05/2021 - Present Tech City

Leading provider of cloud-based solutions for businesses.

- Built scalable cloud infrastructure supporting over 100 applications.
- Managed compute and storage resources, optimizing for cost and performance.
- Implemented backup and disaster recovery solutions, ensuring 99.9% availability.

Infrastructure Engineer

Cloud Innovations Ltd.

06/2019 - 04/2021 Innovation Park

Company specializing in custom cloud solutions for various industries.

- Performed system upgrades and regular patching to enhance security.
- Utilized Terraform and Ansible for automating infrastructure management.
- Collaborated in a team to support distributed cloud systems architecture.

EDUCATION

Bachelor of Science in Computer Science

University of Technology

08/2015 - 05/2019 Cityville

STRENGTHS

Cloud Solutions Architect

Ability to design and deploy highly available cloud solutions.

Infrastructure Optimization Specialist

Strong expertise in optimizing infrastructure for performance and cost.

Virtualization Expert

Proficient in managing virtualized environments effectively.

KEY ACHIEVEMENTS

Successful Cloud Migration

Successfully migrated critical business applications to a secure cloud infrastructure, improving performance by 30%.

High Availability Project Lead

Led a team project that enhanced system availability through robust backup strategies, achieving a 100% reduction in downtime during upgrades.

SKILLS

Hard Skills

Virtual machines management

Container orchestration

Linux system administration

Cloud networking and security

Terraform

Ansible
