SUMMARY

As a Cloud Infrastructure Engineer with over four years of experience, I specialize in designing, building, and optimizing cloud infrastructure. I excel in managing compute, storage, and networking resources, ensuring high availability and disaster recovery. My passion for cloud technologies drives my commitment to delivering robust and efficient solutions that meet business needs.

EXPERIENCE

Cloud Infrastructure Engineer 06/2019 - Present
ABC Technologies City, Country

- A leading firm specializing in cloud solutions and managed services.
- Built and maintained scalable cloud infrastructure for high-demand applications.
 - Managed and optimized compute, storage, and networking resources, improving performance by 20%.
 - Implemented robust disaster recovery and backup solutions, enhancing system reliability.

Junior Cloud Engineer 06/2018 - 05/2019
DEF Corp City, Country

- A tech company focused on delivering cloud-based solutions.
- Performed system upgrades and patch management across cloud environments.
 - Optimized cloud infrastructure costs by implementing auto-scaling solutions.
 - Enhanced cloud security measures, mitigating risks and ensuring compliance.

EDUCATION

Bachelor of Technology in Computer Science 08/2015 - 05/2019
XYZ University City, Country

LANGUAGES

English Native Tamil Proficient

STRENGTHS

- Problem Solver**
Ability to quickly troubleshoot and resolve cloud infrastructure issues.
- Analytical Thinker**
Strong analytical skills for optimizing infrastructure performance.
- Project Management**
Excellent at managing multiple projects and deadlines.

KEY ACHIEVEMENTS

- Cost Optimization Project**
Redesigned cloud architecture that resulted in a 30% reduction in operational costs.
- Legacy Modernization Initiative**
Led a team in migrating legacy systems to modern cloud infrastructure, enhancing system performance.

SKILLS

- Hard Skills**
- Virtual Machines Management
 - Containerization (Docker, Kubernetes)
 - Linux System Administration
 - Cloud Networking and Security
 - Disaster Recovery Planning
