SUMMARY

I am a highly skilled Cloud Infrastructure Engineer with 6 years of experience in building and maintaining scalable cloud infrastructures. I excel in managing resources efficiently and implementing effective disaster recovery solutions. My passion for cloud technology drives me to continuously improve processes, ensuring high availability and performance of systems.

EXPERIENCE

Cloud Infrastructure Engineer

ABC Tech Solutions

📅 06/2018 - Present 📍 City, State

Leading tech solutions company specializing in cloud services.

- Designed and implemented scalable cloud infrastructure across multiple environments
- Managed critical network resources ensuring high availability and performance

Infrastructure Engineer

Cloud Innovations Inc.

📅 05/2016 - 05/2018 📍 City, State

Innovative company providing cloud solutions and services.

- Optimized costs and enhanced performance with effective resource management
- Executed disaster recovery plans to ensure system resilience

Systems Engineer

Tech Forward Ltd.

📅 01/2015 - 04/2016 📍 City, State

A forward-thinking company delivering cutting-edge tech solutions.

- Played a key role in system upgrades and regular patching schedules
- Utilized Terraform and Ansible for automated infrastructure provisioning

EDUCATION

Bachelor of Technology

XYZ University

📅 08/2015 - 05/2018 📍 City, State

LANGUAGES

English

Native

Hindi

Proficient

STRENGTHS

System Design

Strong ability to design and implement complex cloud systems

Automation Expertise

Proficient in automating cloud infrastructure processes

Cloud Management

Experienced in managing and optimizing cloud environments

KEY ACHIEVEMENTS

Cost Optimization Project

Successfully led a project that reduced cloud infrastructure costs by 30% while improving performance.

Disaster Recovery Implementation

Implemented a disaster recovery strategy that ensured system uptime during critical outages.
