Profiles	 Gokul krishna  Gokul krishna	
Summary	<u>B.Tech</u> graduate in Artificial Intelligence and Data Science with expertise in AI, Data Science, and a strong interest in UI/UX design. Known for strong leadership, adaptability, and excellent team collaboration. Passionate about solving complex problems and building user-centric digital solutions. Eager to contribute to innovative, high-impact projects in the tech industry.	
Experience	bezgoFresh UI/UX Desinger	Nov 2024 - June 2025 Palakkad
	- Designed intuitive, user-friendly interfaces for both web and mobile applications - Collaborated closely with developers and cross-functional teams to align design with user needs and technical feasibility - Conducted user research and gathered feedback to inform design decisions - Translated user requirements into clean, functional, and visually appealing designs - Maintained design consistency and usability standards across platforms - Participated in design reviews and iterated based on team and stakeholder input	
	Camino Info Teach Intern	August 2024 Ernakulam
	- Completed a one-month internship focused on core Python programming and real-world coding practices - Gained hands-on experience in problem-solving using Python - Strengthened understanding of key concepts such as data structures and object-oriented programming (OOP) - Worked on practical tasks and collaborative projects to apply programming knowledge - Improved coding efficiency and best practices through mentor feedback and peer collaboration	
Projects	Credit Card Spam	August 2024
	Credit Card Spam Detection System Technology: Python, Machine Learning, Scikit-learn - Developed a system to identify fraudulent and spam credit card transactions with 93% accuracy. - Utilized machine learning algorithms for classification, ensuring accurate detection of legitimate vs. fraudulent transactions. - Applied data preprocessing and feature engineering techniques for effective model training and evaluation. - Contributed to enhancing the security of financial systems by reducing the risk of fraud. Email Spam Detection System Technology: Python, Natural Language Processing (NLP), Scikit-learn - Built an email spam filter to classify spam and legitimate emails with high accuracy. - Employed NLP techniques, including tokenization, stopwords removal, and TF-IDF for feature extraction. - Trained and tested machine learning models for spam classification. - Improved email security by automating the detection of unwanted and potentially harmful emails.	

Technical Skills	Programming Skills Python, Java, C++
	Machine Learning & AI Knowledge Machine Learning, Deep Learning, NLP
	Tools & Technologies AI / ML Libraries, Data Tools, GenAI
	UI/UX figma
Interests	Tech blogs
	YouTube tutorials
	Exploring the latest tech gadgets
	Researched
	Making IoT
Awards	Rajyapuraskar Kerala State Bharat Scouts and Guides
	2018
Soft Skill	Leadership
	Team Collaboration
	Adaptability
	Problem-Solving And Logical Reasoning
	Time Management
	Continuous Learning
Education	CMS College of Engineering and Technology Artificial Intelligence And Data Science 8.2 CGPA
	2022-2026 B-Tech
	VCHSS Bio-Science 78%
	2020-2022 Higher secondary
	Elenthikara High School 97%
	2019-2020 High School
Languages	English
	Malayalam
	Tamil
	Hindi
