SUMMARY

I am an experienced Cloud Platform Engineer with over 4 years of hands-on experience in building, deploying, and managing cloud platforms. I take pride in developing CI/CD pipelines and enhancing security and reliability for containerized applications. My goal is always to improve the developer experience and drive efficiency within the teams I work with.

EXPERIENCE

Cloud Platform Engineer

XYZ Corp 06/2021 - Present City, Country

A leading tech company specializing in cloud solutions and platform services.

- Developed and maintained internal cloud platforms using Kubernetes and Docker.
- Implemented CI/CD pipelines using Jenkins and GitHub Actions to streamline application deployment.
- Managed Kubernetes clusters ensuring optimal performance and security.

Junior Cloud Engineer

Tech Solutions Inc. 05/2020 - 05/2021 City, Country

A software development company focused on delivering innovative cloud services.

- Designed self-service tools for developers, improving deployment speed by 30%.
- Collaborated with development teams to enhance the developer experience on the cloud.
- Monitored and ensured the reliability and scalability of cloud services.

Cloud Engineering Intern

Innovatech 06/2019 - 04/2020 City, Country

A cloud technology provider that specializes in digital transformation.

- Contributed to the migration of legacy applications to cloud-native architectures.
- Assisted in implementing security best practices for cloud platforms.

EDUCATION

Bachelor of Science in Computer Science

ABC University 08/2017 - 05/2021 City, Country

LANGUAGES

English Native ●●●●● Hindi Proficient ●●●●●

STRENGTHS

- Container Management**
Expertise in managing and orchestrating containerized applications.
- CI/CD Expertise**
Strong knowledge of CI/CD processes and tools for automation.
- Cloud-Native Development**
Proficient in developing cloud-native applications to enhance scalability.

KEY ACHIEVEMENTS

- Deployment Automation Tool**
Developed a self-service tool that reduced deployment times significantly, enhancing team productivity.
- Legacy Migration Project**
Successfully led a project to migrate legacy systems to a cloud-native architecture, improving system performance.
