SUMMARY

As a Cloud Platform Engineer with 7 years of experience, I excel in developing scalable cloud platforms, building CI/CD pipelines, and ensuring application reliability. My strong command of Kubernetes and Docker allows me to enhance developer workflows and drive operational efficiencies. I am committed to continuous improvement and cloud innovation, and I thrive in collaborative environments.

EXPERIENCE

Senior Cloud Platform Engineer

Cloud Engineering Solutions 01/2020 - Present City, Country

A leading company providing cloud infrastructure and services for businesses.

- Led a team to develop and maintain scalable internal cloud platforms.
- Implemented CI/CD pipelines reducing deployment time by 30%.
- Managed Kubernetes clusters ensuring high availability and performance.

Cloud Platform Engineer

Tech Innovations Inc. 03/2016 - 12/2019 City, Country

A technology firm specializing in advanced cloud solutions.

- Designed and implemented container orchestration solutions using Kubernetes.
- Enhanced security and reliability of cloud services through best practices.
- Developed self-service tools improving developer efficiency.

Junior Cloud Engineer

Future Tech Labs 07/2015 - 02/2016 City, Country

An innovative lab focusing on the latest technology trends.

- Collaborated with development teams to define cloud deployment strategies.
- Conducted training on Docker and CI/CD tools for improved team performance.
- Monitored and optimized resource allocation leading to cost savings.

EDUCATION

Bachelor of Science in Computer Science

University of Technology 08/2012 - 06/2016 City, Country

LANGUAGES

English Native ●●●●● Spanish Advanced ●●●●●

STRENGTHS

- Cloud Design Expert**
Strong expertise in cloud platform design and architecture.
- CI/CD Specialist**
Proficient in optimizing CI/CD workflows for efficiency.
- Team Player**
Ability to work collaboratively with development teams.

KEY ACHIEVEMENTS

- Cloud Transition Leader**
Successfully led the transition of legacy systems to cloud-native architectures, resulting in significant cost reductions and improved performance.
- Tool Development Champion**
Developed a self-service deployment tool that reduced the onboarding time for new developers by 40%.
