### SUMMARY

As a Cloud Systems Engineer with over 6 years of experience, I specialize in managing and optimizing systems in cloud environments. I excel in automating processes using scripting languages and have a track record of implementing effective security measures. My passion for technology drives my continuous learning and improvement in cloud technologies.

### EXPERIENCE

Cloud Systems Engineer 06/2019 - Present  
Tech Solutions Inc. City, Country

A leading tech company specializing in cloud solutions.

- Configured and maintained over 50 cloud-based servers, significantly improving uptime.
- Automated system provisioning using Python scripts, reducing setup time by 30%.
- Led a team in optimizing system health monitoring processes, enhancing performance metrics.

Systems Engineer 06/2017 - 05/2019  
IT Innovations LLC City, Country

An innovative IT consulting firm specializing in cloud services.

- Developed shell scripts for system hardening that improved overall system security.
- Implemented logging tools that streamlined the troubleshooting process.
- Monitored system performance post-deployment and made recommendations for improvements.

Junior Systems Engineer 02/2016 - 05/2017  
Cloud Experts Corp. City, Country

A cloud consulting company focusing on enterprise solutions.

- Collaborated with cross-functional teams to enhance server configurations.
- Provided training on cloud management practices to junior engineers.

### EDUCATION

Bachelor of Technology in Information Technology 08/2015 - 05/2019  
XYZ University City, Country

### LANGUAGES

English Native ●●●●● Hindi Native ●●●●●

### STRENGTHS

- Analytical Mindset**  
Strong analytical skills applied to system performance optimization.
- Automation Expertise**  
Ability to automate repetitive tasks, enhancing operational efficiency.
- Strong Communication**  
Effective communicator, translating technical concepts to non-technical stakeholders.

### KEY ACHIEVEMENTS

- Process Automation Project**  
Successfully automated the deployment process, reducing manual errors and improving efficiency.
- System Reliability Improvement**  
Achieved a significant reduction in system downtime through proactive monitoring and troubleshooting.
