AP

SUMMARY

I am a fresh graduate with a passion for DevOps practices, especially in cloud environments. I have a solid understanding of CI/CD pipelines, cloud services, and automation tools. I am eager to apply my knowledge and skills to contribute to a team's success by enabling efficient software delivery and maintaining secure cloud operations.

EDUCATION

Bachelor of Technology

Example University

📅 08/2022 - 05/2024 📍 Sample City, ST

LANGUAGES

English

Native

TRAINING / COURSES

Cloud Computing Essentials

A comprehensive course on cloud services including AWS, Azure, and GCP.

CI/CD Tools and Strategies

Course focused on CI/CD tools and practices, including Jenkins and GitHub Actions.

STRENGTHS

Cloud Computing Knowledge

Strong foundation in cloud computing and CI/CD practices.

Quick Learner

Ability to quickly learn and adapt to new technologies and methodologies.

Effective Communicator

Excellent communication skills for collaboration with development and operations teams.

KEY ACHIEVEMENTS

Project on Jenkins Automation

Successfully completed a group project that automated deployment processes using Jenkins.

Cloud Server Setup Project

Led a university project on setting up a cloud server environment for a mock company.

SKILLS

Hard Skills

AWS

Azure

GCP

Jenkins

GitHub Actions

Terraform

Docker

Kubernetes

Linux

Bash

Python

Soft Skills

Team Collaboration

Problem-Solving

Adaptability

Time Management
