

RITHIK KRISHNAN B

Cloud Infrastructure Engineer (Fresher)

123-456-7890 • rithik.krishnan@example.com • <https://www.linkedin.com/in/rithikkrishnan> • City, State

Summary

I am a recent Computer Science graduate with a passion for cloud infrastructure. I have gained experience through academic projects, focused on building scalable cloud applications. My strong understanding of distributed systems and proficiency in Terraform and Ansible make me well-equipped to contribute to cloud engineering teams. I am eager to leverage my skills to optimize and maintain cloud environments effectively.

Experience

N/A

City, State

Cloud Infrastructure Engineer Intern

06/2023 - Present

Self-initiated projects in cloud infrastructure and services.

- Developed a mini project focused on building a cloud-based application using AWS services.
- Participated in university projects that involved configuring virtual machines and networking.

N/A

City, State

Academic Project Contributor

06/2022 - 05/2023

Engaged in projects related to infrastructure management.

- Completed projects during academic tenure focused on distributed systems and cloud deployment.
- Collaborated with peers to optimize resources for performance during simulations.

Education

ABC University

City, State

Bachelor of Technology in Computer Science

08/2019 - 05/2023

Strengths

Cloud Infrastructure Knowledge

Strong understanding of core cloud services and infrastructure concepts.

Quick Learner

Ability to rapidly learn new technologies and frameworks.

Analytical Thinker

Excellent analytical skills and attention to detail.

Key Achievements

Cloud Application Project

Successfully built a cloud-based application that simulated real-world cloud deployment scenarios.

Academic Achievement

Achieved high grades in coursework related to cloud networking and security.
