SUMMARY

I am a dedicated Cloud Infrastructure Engineer with over 5 years of experience in building and optimizing cloud solutions. I excel in managing compute, storage, and networking resources to enhance application performance. My strong background in system administration and passion for technology enable me to implement robust backup and disaster recovery solutions effectively.

EXPERIENCE

Cloud Infrastructure Engineer

Tech Innovations Inc.

📅 01/2021 - Present 📍 San Francisco, CA

A technology company specializing in cloud solutions and infrastructure.

- Built and maintained scalable cloud infrastructure for multiple applications
- Managed compute, storage, and networking resources to optimize performance
- Implemented robust backup and disaster recovery solutions

Cloud Engineer

Cloud Services Co.

📅 01/2019 - 12/2020 📍 Remote

A cloud services provider focusing on data storage and management.

- Performed system upgrades and patching to ensure security and reliability
- Optimized infrastructure costs while improving efficiency using Terraform
- Worked with containers to streamline application deployment

Junior Cloud Engineer

Innovatech Solutions

📅 06/2018 - 12/2018 📍 Los Angeles, CA

An IT solutions company focusing on infrastructure development.

- Collaborated on a project to enhance cloud networking and security protocols
- Designed distributed systems for resilient applications in a cloud environment
- Utilized Ansible for configuration management and automation tasks

EDUCATION

Bachelor of Science in Computer Science

University of Technology

📅 09/2015 - 06/2019 📍 San Francisco, CA

LANGUAGES

English

Native

Spanish

Advanced

STRENGTHS

Cloud Architecture Knowledge

Strong understanding of cloud architecture and distributed systems.

Project Management

Ability to work independently and manage multiple projects simultaneously.

Automation Expertise

Proficient in automating processes and improving workflows.

KEY ACHIEVEMENTS

Cloud Migration Project

Successfully led a team to migrate legacy systems to a cloud environment, reducing costs by 30%.

Disaster Recovery Enhancements

Engineered a highly available backup solution that improved data recovery times by 50%.
