

ALEX JORDAN

Cloud Engineer

+1234567890 • cloudengineer@example.com • <https://www.linkedin.com/in/cloudengineerprofile> • Tech City, ST

Summary

As a Cloud Engineer with over three years of hands-on experience, I specialize in designing, deploying, and managing cloud infrastructures across AWS and Azure. My focus is on ensuring high availability and security while optimizing resource utilization. With a solid foundation in Infrastructure as Code, I thrive on automating deployments and collaborating with teams to solve complex challenges in the cloud.

Experience

Tech Solutions Inc.

Remote

Cloud Engineer

03/2021 - Present

A leading tech firm specialized in cloud-based solutions and consultancy.

- Designed and implemented scalable AWS cloud infrastructure for multiple projects
- Automated deployment processes using Terraform, reducing deployment time by 30%
- Monitored and optimized AWS resources using CloudWatch

Innovative Cloud Corp.

Urban Center, ST

Junior Cloud Engineer

06/2019 - 02/2021

A cloud computing company focused on providing cloud integration services.

- Collaborated with DevOps teams to streamline CI/CD processes in cloud environments
- Handled troubleshooting and resolution of cloud-related outages within SLAs
- Conducted security audits and implemented best practices for cloud services

Education

State University of Technology

Tech City, ST

Bachelor of Science in Computer Science

08/2015 - 05/2019

Strengths

✓ Adaptability

Ability to quickly learn and adapt to new technologies in cloud computing.

Troubleshooting Expertise

Strong troubleshooting skills under pressure, ensuring minimal downtime.

Cost Optimization

Proficient in designing cost-effective cloud solutions tailored to business needs.

Key Achievements

✓ Legacy Application Migration

Successfully migrated a legacy application to cloud infrastructure, enhancing performance and reducing costs.

Deployment Automation Framework

Implemented an automation framework that improved deployment efficiency and reduced errors.
